

FG FINANCIAL PREFERRED INCOME FUND

Quarterly Report June 30, 2009

INVESTMENT OBJECTIVE

FG Financial Preferred Income Fund is a fixed income fund that aims to provide the highest possible level of return while still maintaining liquidity and preserving capital, mainly through investments in government bonds, certificates of deposit, and mortgages. The Fund seeks to provide stable returns to unit holders in excess of average term deposit rates.

INVESTMENT STRATEGY

The Preferred Income Fund invests predominantly in government bonds and bank deposits but enhances its yield through investing in a diversified portfolio of mortgages and preference shares. Its emphasis is on principal protection and constant income generation.

INVESTMENT RISK AND RETURN

The Preferred Income Fund carries a low level of risk to the investor based primarily on investment in a combination of short-term financial instruments and government guaranteed securities. Our expected long-term rate of return is 5.5% to 6.5% per annum.

SECOND QUARTER 2009 REVIEW

The Preferred Income Fund ended the second quarter with a net asset value per share of \$1.0622, a return of 1.32% for the quarter. The Fund outperformed its benchmark, the weighted average bank term deposits rate, by 32 basis points during the quarter. Year-to-date, the Fund achieved a return of 2.56%, outperforming its benchmark, which reported returns of 2.00%. The Fund's average annualized return from inception (April 1st, 2008) was 4.98% substantially outperforming its benchmark which achieved 3.91%.

The Preferred Income Fund experienced modest growth for the year, as investors sought lower levels of exposure to the volatility of the equities market. Net assets available to shareholders increased by nearly \$141 thousand due to net subscriptions of \$67 thousand and investment income of \$74 thousand. Government and government-related bonds, which constitute the majority of our portfolio provided annualized returns of 5.77%. We anticipate a further boost in returns from an investment in mortgage loans in the short-term.

Our long-term objectives remain the same...maximizing fund participant returns at an acceptable level of risk.

Net Asset Value Performance

Fund Composition
