

FG FINANCIAL DIVERSIFIED FUND

Quarterly Report September 30, 2008

INVESTMENT OBJECTIVE

FG Financial Diversified Fund is a balanced fund whose objective is to provide above-average income and opportunities for long-term growth of capital. Balanced funds are generally “middle of the road” investments that seek to provide a combination of growth, income and conservation of capital by investing in a mix of stocks, bonds, and/or fixed income securities.

INVESTMENT STRATEGY

The Diversified Fund invests primarily in a combination of Bahamian equities (listed and non-listed), mortgages, and fixed income securities. The Fund may also invest in term deposits and in publicly traded or privately issued preference shares.

INVESTMENT RISK AND RETURN

The Diversified Fund caters to investors with a moderate risk profile. The positioning of a balanced fund allows for investors to reap the benefits of an upturn in the equities market while not suffering the full impact during economic downturns. Our long-term expected rate of return for this Fund is 6.5% to 8% per annum.

THIRD QUARTER 2008 REVIEW

The Diversified Fund ended the third quarter with a net asset value of \$1.0244 compared to the ending second quarter net asset value of \$1.0098. For the quarter ended September 30, 2008, the Fund achieved a positive return of 1.45% meeting its benchmark, which reported returns of 1.44% over the same period. Over the past six months, the Fund underperformed compared to its benchmark, obtaining a yield of 2.44% compared to the benchmark return of 2.88%. This occurred mainly due to the less than stellar performance of the Fund’s equity portfolio.

The Fund’s asset allocation saw moderate movements over the quarter. Bonds decreased from 62% to 59%. Cash and equivalents increased from 27% to 30%. Our equity holdings and preference shares remained the same at 5% and 6% respectively.

We continue to maintain our higher allocation of bonds in the Diversified Fund for the interim, due to continued contractions in the local capital markets. As market conditions improve, we will move to reduce our current bond balances in favor of higher performing equities.

Net Asset Value Performance

Fund Composition

Performance Analysis	QTR 3	6-MTH	Y-T-D	1-Year
